

As a Senior Applications Engineer at Rackwise, you will join us in producing products that will enable our customers to simplify and cost effectively manage the physical infrastructure of their datacenters. When you join our development team, you will be responsible for designing and developing commercial web and desktop based applications using the latest Microsoft development tools and .NET compliant application frameworks in our Raleigh, North Carolina office.

Required Skills:

- Solid background in web application development using Microsoft ASP.NET and C#
- A thorough knowledge of Microsoft Winform GUI development using C#, .NET and Office Development tools, specifically with the Microsoft Office Development SDK.
- A thorough knowledge of software engineering best practices with a proven track record of implementing creative solutions both as an individual and on a team.
- Strong background in usability of user interfaces developed for the web or desktop environments.
- Bachelor's degree in Computer Science, Engineering or equivalent
- Strong understanding of object-oriented concepts, design patterns and development processes
- Minimum of 7 years structured software development experience
- Minimum of 4 years experience in relational database design and modeling using MS SQL Server
- Minimum of 3 years experience in web based user interface design using ASP.NET.
- Minimum of 4 years experience in C#, .NET development.
- Minimum of 2 years experience with the Microsoft Office SDK and add-in development.
- Development experience with HTML, XML, XSLT, CSS and Web Services is required.
- Exceptional verbal and written communications skills
- A thorough knowledge of software engineering best practices with a proven track record of implementing creative solutions both as an individual and on a team.
- By far the most important skill is the ability to work as a team player. This entails being individually productive--on time and within budget--and working with others in a creative environment to solve problems as a team. It includes team loyalty, contributing ideas, being respectful of others, and the ability to get behind a decision once it is made.
- Candidate must be innovative and motivated by the need to help others solve problems and get things done

Preferred Skills:

- Experience with the Microsoft Office development for Visio
- .NET 3.5/Compact Framework,

Additional Non-Tech Skills: In addition to the team skills described above, the candidate should have strong technical leadership qualities, and possess good technical writing, presentation, and organizational skills. The candidate must have impeccable ethics and possess the ability to have fun while working hard.

Local candidates not required but no relocation assistance will be provided.
